

Digital Plan on a Page

'For the people of Derbyshire to have the best start in life, stay healthy, age well and die well'

Quadruple Aim: Improve Population Health; Patient experience; Staff Experience and per Capita Cost

"We will use digital services to facilitate system change, across the whole health and social care economy. To ensure appropriate and accurate information is available and accessible to our patients and their clinicians, supporting the provision of high quality outcomes, in the delivery of joined up care"

Leadership | Governance | Accountability | Skills & Resources

Patient centric | Safe & Secure | Collaborative & Integrated | Efficient delivery

Digital Channels	Integrated Care Records	Identity, security & privacy	Partners / industry	Population Health
Self-care Management	Provider Maturity	Infrastructure	Ecosystem	Operational Analytics
Prevention & Wellness	Efficient operations	Collaboration	Disruptive Technology	Clinical data analytics
PHR	Digital ready workforce		Incubators	

The Case For Change is built on the System Outcomes and Clinical Priorities.

The digital strategy is clinically led – engagement with each workstream to understand what the clinical model will be, inform and advise on what the digital opportunity can be and then determine a work programme for each area (see separate slides)

Digital strategic themes reflect NHS Digital and NHSX vision for delivery and also complement the local operating environment

The JUC Derbyshire Digital principles underpin how we will engage and deliver the work

We will deliver this through a strategy of **Converge and Connect**
