Lynch Syndrome e-Learning

Lynch syndrome is a cancer predisposition syndrome in which the main concerns are colorectal and endometrial cancer. There is also a risk of other cancers, although less frequently. The training below will help you manage your Lynch syndrome patients as they first present to you.

Cancer Care Reviews Training Package

Benefits of the Cancer Care Review for patients and Healthcare Professionals

The Cancer Care Review provides an opportunity to address patient's holistic needs and ongoing support and information. The CCG are offering Practice Nurses the opportunity to complete an online nurse training course to carry out an effective Cancer Care Review.

The course is intended for Practices Nurses, but anyone who undertakes Cancer Care Reviews within your Practice can register.

For access to the Cancer Care Training Package, please click on the link below:

Breast Cancer Essential Update

<https://bit.ly/3cnD5gQ>

27 Oct 2022, 13:00—Presenter Dr Pawan Randev

Cancer Awareness Month and Campaigns

Breast Cancer

Symptoms include:

- a change in the size or shape of either breasts
- discharge from either nipples, which may be streaked with blood
- a lump or swelling in either of the armpits
- dimpling on the skin on breasts
- a rash on or around the nipple
- a change in the appearance of the nipple, such as becoming sunken into the breast

Breast pain is not usually a symptom of breast cancer. [Breast Cancer Awareness Month](#) | [Breast Cancer Now](#)

Liver Cancer

Cancer that starts in the liver (primary liver cancer) doesn't usually cause symptoms in the early stages. Symptoms include:

- weight loss
- itching
- feeling sick
- yellowing of the skin and whites of the eyes (jaundice)
- swollen tummy (abdomen)
- loss of appetite or feeling full after eating small amounts
- pain in your abdomen
- a lump in the right side of your abdomen
- pain in your right shoulder
