Name of project: ND Community Hubs

Project Lead: Susanne Croll

What was the aim?	How was it done?	What were the outcomes?
<p>To support families, parents and carers that have neurodivergent children (ND)</p> <p>To help reduce the current waiting lists for assessment</p>	<p>It was part of the ND Transformation Business Case that included further funding for our current providers to support the reduction in waiting times by increasing their workforce.</p> <p>The ND Transformation Plan is a three year plan and we have completed year one.</p> <p>We followed a procurement process to secure 4 hubs across Derbyshire</p> <p>We ensured that we engaged with our parent carer forums, stakeholders and the voluntary community and social enterprise sector from the very beginning of the project. This was done through working groups, task and finish groups and ensuring that we were always available to answer queries and respond to requests.</p>	<p>We have only seen year one so far as this was the implementation phase, three of the hubs had a later commencement date due to various issues but we are now seeing an increase in footfall and positive feedback from hub attendees</p>
What did you learn?	What's next?	Anything else to add 

<p>That it's vital to have all stakeholders are on board and to listen to their experiences in order to build and develop services that actually help and support the people that we design the services for.</p>	<p>The hubs are currently being developed further</p> <ul style="list-style-type: none">• "Vaccination discussion" training being developed• Collaborative working with the Derby City Family Hubs• Being developed as part of the assessment/triage process for ND diagnosis	<p>We have added the ND Hub information to the Emotional Health and Wellbeing website and worked in collaboration with both local authorities to include on their websites as part of the local offers.</p> <p>We are also looking at developing a microsite for children and young people (CYP) that will see closer working with CYP in the design and development.</p> <p>Possibility of an app to mirror all work to date.</p>
